Objective of the Fund

The main subject of investment is Japanese stocks, and the objective of the Fund is to appreciate the trust assets by actively managing the investments.

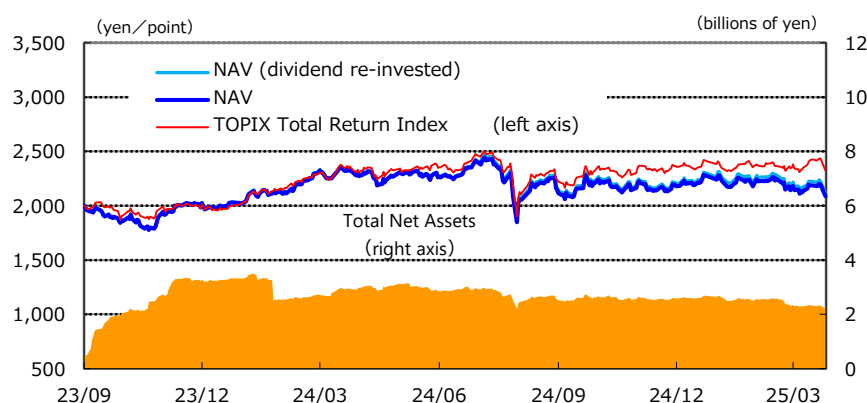

Investment Policy

- In pursuing its investment objective, the Fund evaluates a company's business model, management strategy, and financial strategy based on bottom-up research and analysis of individual companies, and mainly invests in Japanese stocks that are expected to achieve a high ROE (Return on Equity) in the medium- to long-term.
- In constructing its portfolio, the Fund determines its incorporated ratio by taking into consideration past financial performance, reproducibility of future earnings, valuation (the degree of overvaluation and undervaluation of stock prices), and other pertinent information.
